LUNAR CALENDAR GUIDE

○ The new moon is the lunar phase that occurs when the moon appears as a dark silhouette against the sky, and it is not visible to the naked eye. The new moon marks the beginning of the lunar cycle and represents a fresh start and new beginnings. It is a time of introspection, reflection, and setting intentions. The absence of moonlight during this phase creates a dark and quiet atmosphere, making it an opportune time for self-reflection, planning, and planting seeds for future endeavors. It is often associated with a sense of renewal, inner growth, and the potential for transformation.

☾ The waxing moon is the lunar phase that occurs after the new moon and before the full moon. This phase symbolizes growth, manifestation, and the building of energy. It is often associated with setting intentions, taking action, and the realization of goals and desires.

● The full moon is a captivating celestial event that showcases the moon in its fullest and brightest form. The full moon is often seen as a symbol of mystery, enchantment, and potential transformation. The full moon lights up every aspect of your life and your manifestations and it shows you what's helping you and what's blocking you. The full moon is time to tune in and become aware of what's helping get closer to the life you desire or what is hurting you. It is a time to let go of what is hurting and celebrate all of the good in our life. The full moon could be a chaotic time with high emotions and it is best to stay grounded in gratitude and let go of whatever needs to go.

☾ The waning moon is a lunar phase that occurs after the full moon and before the new moon. This phase symbolizes completion, release, and letting go, often associated with reflection, introspection, and the shedding of old patterns or aspects of life.
